

Elena Levine

248-704-5799 | levinee7@miamioh.edu | <https://www.linkedin.com/in/ElenaLevine/>

Honors Computer Science student | Aspiring Software Engineer | AI/ML, Java, Python and Web Development HTML/CSS

Education & Certifications

Bachelor of Science in Computer Science, Minor in Deep Learning and AI

Aug 2024 - Present

Miami University Honors Program, Oxford, OH

GPA 3.83

Anticipated Graduation: May 2028

- Relevant Coursework: UMICH summer class Applied Generative AI Specialization, CSE268 + CSE468—AI Knowledge Representation Study Abroad, CSE432 Machine Learning, CSE383 Web Application Programming, CSE374 Algorithms I, CSE278 Systems I, CSE271 Object-Oriented Programming (Java), CSE274 Data Abstraction & Data Structures, CSE201 Intro to Software Eng, Python Programming, Intro to C#, AP Comp Sci A
- Dean's List Fall 2024, Fall 2025, Spring 2026, and President's List Spring 2025

Technical Experience

Summer Research Assistant – Miami University Computer CSE/AI Research

Summer 2026

- Worked alongside a PhD student in a faculty-led project to collect terrain data and explore SLAM implementations to construct autonomous wheelchairs for the blind

AI Knowledge Representation Study Abroad – Miami University AI Program

May – Jun 2026

- Completed two Knowledge Representation courses while studying at the University of Calabria, Italy, understanding how to utilize Answer Set Programming through DLV in programming optimization techniques and applying it towards collaborative projects.

Technical Skills

Languages: Java, Python, C#, C++, HTML, CSS, DLV **Tools / Technologies:** Git, Visual Studio, VS Code, Terminal, WinSCP, Bootstrap

Projects

Personal Portfolio Website | HTML, CSS, Java | <https://elenal2268.github.io/Personal-Webpage/>

Aug 2025

- Designed and deployed a responsive personal website to showcase projects and resume

CSE468 Applied Knowledge Representation – Isle Wars AI Bot

June 2026

- Worked in small group to create an AI bot through DLV to optimize a playing technique for Isle Wars

CSE432 Machine Learning – Speech Emotion Recognition Classifier

May 2026

- Preprocesses raw vocal data into uniform, distinct emotions used to help classify future data
- Compares different ML classification techniques and their corresponding performance/accuracy-based metrics

CSE383 Web Development – Movie Search Website

May 2026

- Incorporated Bootstrap, JavaScript, Ajax, and query results from the TMDb database to create a dynamic movie search website

CSE274 Data Structures – Alternating Sign Rearranger & Annotation Tracker Exams

Mar-May 2025

- Leveraged LinkedList and StringBuilder to manipulate two arrays into a uniquely combined list with minimal time complexity
- Utilized HashMap and LinkedList to develop a system for users to create, sort, and modify IDs with corresponding comments

CSE201 Intro to Software Engineering – Haunted House Escape Room Interactive Game

May 2025

- Led group project developing code to allow players to wander a text-based maze with commands and feedback

Leadership & Activities

Executive Board of Girls Who Code -- Teacher and Mentor

Aug 2025 - Present

- Delivering hands-on instruction in Python and Java to twenty middle school girls, encouraging participation in engineering fields

Varsity D1 NCAA Collegiate Synchronized Figure Skater

Aug 2024 - Present

- Collegiate D1 NCAA 2x National Champion for Synchronized Figure Skating – Mar 2025
- Balanced rigorous practice schedule with full engineering workload demonstrating strong commitment and time management
- Trained peer skaters in highly technical skating maneuvers and coached at Learn to Skate to teach the next generation

TEAM USA, Synchronized Figure Skater

Nov 2022 - Mar 2024

- Represented the United States in international competitions in Austria and France, as well as domestically
